To the reader

This codebook is part of the data FSD1009 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Gallup Finland & University of Helsinki: Finnish Voter Barometer March 1982 [dataset]. Version 1.0 (2000-08-14). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD1009>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Finnish Voter Barometers

The Finnish Voter Barometer surveys are commissioned by the major parties in the Parliament. In election years, other sponsors have also been involved. Up till 1988, the surveys were planned by Gallup Finland (TNS Gallup Ltd) and the Department of Political and Economic Studies at the University of Helsinki, in collaboration with the political parties. After 1988, the planning has been in the hands of Gallup Finland and the parties.

From 1973 to 1990, the annual voter barometers were collected mainly with face-to-face interviews using structured questionnaires, 1000-2000 interviews/barometer. Since 1991, the data have been collected with GallupChannel (PC's installed in respondents' homes). No surveys were conducted in 1985 and 1989.

Survey themes include voting behaviour, opinions on the government and the parties, and attitudes towards national political issues. In addition, respondents' economic expectations and political participation have often been studied, as well as their opinions on local politics, and the significance of the party leader to a party. Background variables have often included the social class of the respondent and the household head, economic activity of the household head, respondent's education, age, mother tongue, gender, party membership, political views, trade union membership, and family's annual income. There are also regional variables. Even though the variables are not always fully comparable from one survey to another, all kinds of comparisons over time are possible. The FSD collections cover data from 1973.

Abstract

The variables describe the following: voting in the electoral college elections, choice of the presidential candidate, information sources used in the voting decision, when that decision was made, discussion on the electoral college elections, newspaper reading, opinions on the election method, political alienation, left/right distinction between the parties and the presidential candidates, image of the presidential candidates, aims of political activity, image of the parties, political right, left and centre, conflicts of interest between the various population groups, privileged groups, future prospects of the economical situation, class affiliation, party support, and voting in the presidential elections. Some variables are connected with the interview situation and the social structure of the sample.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Finnish population aged 18 or over

Collection date: 10.3.1982 – 13.4.1982

Data collector(s): Gallup Finland

Data producer(s): Gallup Finland; University of Helsinki. Department of Political Science

Mode of data collection: Face-to-face interview

Type of research instrument: Structured questionnaire

Time period covered: 1982

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Number of variables and cases: The data contain 370 variables and 1789 cases.

Sampling procedure: Probability: Multistage

At first, the target population was stratified according to the number of inhabitants aged 18 or over in each province and in the second stage, by municipality group within each province. Municipalities were classified into five groups on the basis of their level of industrialisation. The stratifying frame achieved in this manner was used to count how many interviews should be done in the municipalities of each municipality group in order to have a geographically and demographically representative sample. The municipalities in the sample have been selected with the Deming zone selection method. This method is based on the use of random numbers and gives each municipality an equal chance to be selected, although municipalities with large population have a better chance to be selected. A municipality may be sampled more than once - in which case more than one starting point is drawn for that municipality. The interviews were conducted in clusters of four subjects using the starting point method. The starting points were drawn from the population register, selecting individuals born on the 5th of any month and then selecting starting addresses among them from the sample municipalities at fixed intervals. The first interview was conducted at the starting point, after which the interviewer proceeded to the next three households. Within the household, the person whose birth date was closest to the beginning of any month was chosen for the interview. Interviews were conducted in 53 cities and 87 rural municipalities. The number of respondents was 1,697.

Lopuksi siirtyisin kysymään poliittista kantaanne. Älkää kuitenkaan missään vaiheessa ilmoittako puoluekantaanne minulle. Vastaaminen esitettäviin kysymyksiin tapahtuu siten, että kysyttyäni kysymyksen, Te ympyröitte mielipidettänne vastaavan vaihtoehdon numeron tältä erilliseltä lomakkeelta.

OJENNA VASTAUSLOMAKE JA TARVITTAESSA MYÖS KYNÄ.

Vastaamisen jälkeen pyydän Teitä sulkemaan lomakkeen tähän kirjekuoreen, jonka postitan avaamattomana Suomen Gallup Oy:öön. Tuloksista ei koskaan tule selviämään kenenkään yksityisen vastaajan henkilöllisyys.

Siis siirtykäämme ensimmäiseen kysymykseen: (VUONNA 1980 ÄÄNESTÄNEILTÄ KYSYTÄÄN)

1. Meillä oli kunnallisvaalit lokakuussa 1980. Mitähän puoluetta tuolloin äänestitte? Merkitkää vastaus lomakkeelle. Älkää sanoko mitään.
2. Jos maassamme järjestettäisiin nyt eduskuntavaalit, niin mitä puoluetta äänestäisitte?
3. Entä mikä puolue olisi Teille toiseksi mieluisin?
4. Jos ajattelette omia poliittisia mielipiteitänne, niin miten lähellä tätä yllä merkitsemäännä puoluetta olette?
5. Valitsijamiesvaaleihin puolueet asettivat yhteensä kahdeksan (8) ehdokasta. Merkitkää alla olevaan luetteloon kaikki ne ehdokkaat, joiden äänestämistä harkitsitte sekä se ehdokas, kenen hyväksi äänenne annoitte?

Sijoittakaa nyt vastauksenne tähän kirjekuoreen ja sulkekaa se. Minä lähetän kirjekuoren avaamattomana Gallupille.
