Survey for European Learned Societies

The ENRESSH network have started a joint project to investigate the activities of learned societies in Europe in social sciences and humanities. Learned societies play an important role in European science, but their activities have not been studied very much so far. Our study seeks to make these activities more visible.

By responding to this survey, you give us valuable information about the learned society you represent. Every society's views are important for the study. The questionnaire is delivered to SSH learned societies across Europe.

Responding to the survey takes about 15 minutes.

The responses will be processed confidentially. The results will be published anonymised to prevent an individual society from being identified among the results.

The names of the societies will not be published. Data collected with this questionnaire will be used in a report on the role and activities of learned societies that will be published as an ENRESSH report.

Parts of the data might also be published in scholarly articles. The anonymised survey data will be stored in the Finnish Social Science Data Archive (FSD). The data may be used in further studies. By participating to the survey, you will give the right to use the data for research purposes.

For further information about the study, please contact coordinating researcher Elina Late, Tampere University, [Contact information removed]
